

Alleyn's Lower School

Dulwich, SE22

We previously completed a scheme at Alleyn's Upper School where we constructed a new performing arts centre. So we were delighted to be awarded the contract for Alleyn's Lower School. This consisted of the demolition of the existing Lower School and construction of a dramatic contemporary designed, modern teaching facility. Twelve new classrooms are provided over two levels, together with a multi-purpose space, central atrium and staff offices.

The external walls are made of traditional brickwork construction, including an inner skin of fair faced brickwork. Internal materials include more fair-faced brickwork walls, internal glazing, ceramic tiling, acoustic wall panels and painted plasterboard partitions.

Client: Governors of Alleyn's School

Architect: Tim Ronalds Architects

Quantity Surveying: Arcadis LLP

Contract value: £4M

Form of Contract: JCT SBC 2011 With Quantities
